

If its a table with a central parasol we can accomodate this with a cut-out in your table protector. If you want your protector to have a smooth edge we offer polished edges. Add rubber stops too to stop your protector sliding about on your table.

Your protective film may be Blue in colour, this needs to be peeled off on both sides!

Rubber Stops

If your table has rounded corners we can cut to their shape, you just need to measure (see above).

Outdoor Tables

Outdoor tables can come in many shapes and sizes and include built-in parasols which usually are positioned centrally. Sometimes round or oblong; measuring for the best fit is usually easy when ordering. If you are inclined to put a scale drawing together you can upload this with your order to further illustrate what you want and take any guessing out of ordering. We can cut your order in clear, translucent or coloured plastic so the choice is yours for a unique look. And don't forget you can order samples of any of our material to ensure you are making the right choice.

Indoor Tables

Indoor tables can take a lot of punishment especially during family events including birthdays, anniversaries and seasonal occasions. As all tables are different sometimes a different approach is needed. Tables can be so complex with uneven shaping and non symmetrical edges; meaning a 1:1 template is usually required. This includes making a drawing following the curves or shape of the table so our fabrication team can plot and cut to this profile for an accurate shape. This can be done on liner paper, wrapping paper or anything really that can be used to follow the contours of your table at same-size scale.

Indoor & Outdoor Furniture Protectors [Clear & Coloured]

Protect your tables and surfaces from scratches and spills with our made to measure plastic table protectors. Made from our Clear as Glass Acrylic, our plastic table protectors looks like glass but are 10x stronger and indeed much safer.

CHILD & PET SAFE

Acrylic table protectors - if dropped - will not shatter like glass into sharp, tiny and hard to find shards; should it break it will do so in a few large pieces. We cut acrylic to the size you need to protect your table top and deliver it safely to your door.

FINISHING TOUCHES

We will supply your table protector cut to size, so they are ready to simply cover your chosen piece of furniture. Rubber Stops on your Perspex table protector are available for a more secure finish if you are concerned about possible slippage. Our packs contain 20 or 40 Rubber Stops 11mm x 2mm each available from our website.

CLEANING & MAINTENANCE

Usually just warm water with a small amount of mild detergent and a soft cotton cloth to clean your acrylic will be adequate. Alternatively we're very impressed with the results from our acrylic cleaner VuPlex which polishes acrylic to a high shine in seconds, available from our website to buy.
